Aquavista™ Digital Solutions Optimize Your Water Treatment

Veolia offers secure cloud-based digital services to **reduce operating costs, improve performance, and simplify plant management.** This intuitive monitoring and reporting tool puts key performance indicators at your fingertips!

What are our Smart Water Solutions?

To meet the needs of small, remote sites, as well as large, complex facilities, **Aquavista** can be applied in four tiers:

1. Aquavista Portal - a Remote Monitoring and

Key Features of Aquavista:

> Easy reporting based on real-time data
> Integrated asset management & benchmarking
> Advanced analytics with built-in process expertise
> Cloud-based for remote access & management of multiple sites
> Secure, private and user-friendly web portal
> Instant online access to Veolia's water experts

Smart Water Benefits:

Reporting Tool
At the simplest level, Aquavista provides a cloud-based platform to collect and organize data from your treatment systems, making it readily available 24/7 from any location. This alarm management system alerts operators to make immediate adjustments to improve performance. Operation documentation such as O&M manuals, health and safety info, orders, and service reports are stored for easy accessibility online. It's ideal for multiple sites or remote locations.

2. Aquavista Insight - Data-Driven Performance Optimization
Aquavista aggregates real-time data and applies analytics and algorithms to continuously benchmark and optimize performance. Improved performance equates to cost savings for chemicals, energy consumption, and proactive maintenance that minimizes downtime.

3. Aquavista Assist - a Virtual Process Engineer
A network of Veolia's water experts stand ready to troubleshoot any problem using real-time data and expertise gained from 100 years of best-in class experience. Using the latest technology, our on-call engineers will be able to see and evaluate problems right away.

4. Aquavista Plant - Online Remote Control and Full Auto-Pilot Functionality
A suite of intelligent software and holistic solutions offer state-of-the-art online control, monitoring and forecasting in a dynamic and flexible system. Real time information and forecasts are used to meet operational targets.

> Reduced Operational Costs
> Lower Capital Expenditures
> Improved Performance
> Predictive Maintenance Tools
> Ensures Compliance
> Minimizes Downtime
> Easy Access to Data from Remote Sites
> Real-time Troubleshooting by Water Treatment Experts
